Assembly:

Valve Body	High Tensile Strength Cast Iron
Orifice:	Aluminum (Brass Opt.)
Valve Seat:	Buna-N
Valve Stem:	Plated Steel
Lever:	Zinc & dichromate plated steel
Upper Diaphr Plate	Zinc & dichromate plated steel
Lower Diaph. Plate	Die cast aluminum
Diaphragm	Buna N & nylon reinforcing mtl.
Diaphragm case	Die cast aluminum
Vent Screen	Stainless Steel

General Note on installation: The regulator comes with 3/4" or 1" vent with a stainless steel vent screen. On outside installations, the regulator should be oriented with the vent pointing down to keep water or ice from entering the vent. If the regulator is installed with the vent pointing up or to the side, the vent screen should be removed and an 3/4" x 1" elbow (or elbows) should be installed to position the vent correctly. If installed inside, the vent must be piped to a safe outside location in accordance with NFPA 54 recommendations and/or local codes.

Typical Capacity.

Note: Capacity will change as a function of the orifice size, inlet pressure & outlet pressure setting. The capacity tables below are for a typical configuration: a 1 1/4" Regulator, with 1/2" orifice. Smaller orifices may have less capacity, but will handle higher inlet pressures (see MAOP above). Outlet pipe size and length may also reduce flow. Consult complete brochure for capacities and relief curves of other configurations.
